

TEACHING TIPS FOR ACCOUNTING CASES

CONTENTS

Part 1: Reading and annotating a case	1
Learning how to determine case parameters rapidly	
Knowing what to take into consideration when reading a case	
Determining the most efficient way of annotating a case	
Part 2: Planning out the response.....	13
Structuring the response	
Determining the importance of problems or issues	
Establishing a response plan	
Part 3: Drafting relevant ideas	25
Learning how to integrate ideas	
Knowing how to take the case facts into account	
Ensuring that one's ideas are adequate	
Part 4: Writing new ideas.....	35
Avoiding unnecessary repetition of case facts	
Diversifying the ideas contained in a response	
Being able to present conclusions and recommendations	
Part 5: Presenting ideas efficiently	47
Giving priority to substance over form	
Using the right style	
Adopting the right attitude	
Part 6: Making the right calculations	57
Determining what calculations are needed	
Knowing what to do with calculation results	
Presenting calculations efficiently	

TEACHING TIPS FOR ACCOUNTING CASES

CONTENTS (continued)

Part 7: Analysis of the proposed solution and of the evaluation guide ...	69
Going back over the case parameters	
Carefully studying the suggested solution	
Bringing out the key elements of the evaluation guide	
Part 8: Assessment of a response	81
Identifying the appropriate ideas	
Determining the performance level reached	
Evaluating the effectiveness of a response	
Part 9: Report on assessment.....	93
Supervising the marking of a case	
Improving the way a response is assessed	
Establishing realistic learning objectives	
Part 10: Usefulness of one or more simulated cases	103
Determining what should be retained subsequent to a simulated case	
Making an objective evaluation of the student's learning progress	
Encouraging comparative analysis of cases	
Part 11: Creation of response structures and info-cards	115
Bringing out the response structures	
Creating context-based info-cards	
Creating subject-based info-cards
